Nicole Virgil, CS is a Christian Science Practitioner and a member of the Christian Science Board of Lectureship. Ms. Virgil says, "In this talk, we will examine liberty from a Biblical perspective; and see how real people today find their freedom from all kinds of physical, emotional and circumstantial restrictions that seem clearly beyond their control."

Sharing examples of healing from her own life and professional practice of Christian Science, Ms. Virgil will explain why Christian Science is both Christian and scientific, meaning that people can prove its effectiveness for themselves, as fully described in the book *Science and Health with Key to the Scriptures*, written by the founder of the Christian Science movement, Mary Baker Eddy.

This lecture is sponsored by The First Church of Christ, Scientist in Oakland at 201 North Dithridge
